Pending Direct Loan Disbursements

Due to Federal Regulations, the earliest date that Federal Direct Loan funds may be credited to your UCSD student account for the spring term is March 24th provided all loan disbursement requirements have been meet.

Information is provided on your TritonLink Billing pages indicating pending Direct Loan Disbursement(s). Each Direct Loan listed with an amount indicates it is ready for disbursement on March 24th.

- If “Incomplete” is listed rather than an amount, then there are actions that must be completed by the borrower before the loan can be disbursed.
- If “FAO Processing” is listed rather than an amount, it means the Financial Aid Office (FAO) is working to set up your loan for processing with the Department of Education.

For your convenience, you will note on your Billing pages the “Adjusted Amount Due” which takes into consideration Pending Direct Loan disbursement amount(s).

To ensure that your Direct Loan funds remain ready to disburse on March 24th, you should ensure that you continue to meet all financial aid disbursement requirements.

For Direct Loans, this includes being enrolled in at least 6 units (not including waitlisted units) without any payment holds on your account. Please read the other disbursement requirements to ensure that your funds will be ready at the start of the term. You should also access the “Financial Aid Checklist” on My Tritonlink to ensure you have met all other requirements.
